MULTI-PROCESS VARIABLE LIQUID LEVEL SENSOR

Total Tank Level System (Modbus Output)

Magnetostrictive Liquid & Interface Level Sensor with Temperature outputs

Sensors are available in 316SS rigid and flexible probe designs with a choice of Single or Dual NPT mountings. Systems include an explosion-proof conduit housing containing a wiring terminal strip and an intrinsically safe probe. All systems offer totally welded construction.

The Total Tank Level System is an Explosion Proof sensor with Modbus digital output for total level, interface level and temperature sensor outputs. Temperature sensors are evenly distributed over the active length of the probe.

A variety of floats and mounting accessories are available to fit virtually any application. Contact your local representative to match your needs today.

Accurately Measures:
- Total Level
- Interface Level
- Temperature - 5 sensors over active range.

Modbus RTU digital output for:
- Total level
- Interface level
- Temperature
- System diagnostcs

Easy Installation
- No calibration needed

High Accuracy
- 0.01% of measured span - less than 1 mm absolute, over full measurement range.

Minimal Maintenance
- Unique diagnostic output provides float position beyond active range, as well as loss of float(s).

Designed for Hazardous Area Applications
- Rigid Stainless Steel and Flexible Probe models meet FM, ATEX, and IECEx hazardous area approvals. See specification section for details.
