## 5 Notes
Warnings and symbols used

**DANGER!**
This information refers to the immediate danger when working with electricity.

**DANGER!**
These warnings must be observed without fail. Even partial disregard of this warning can lead to serious health problems and even death. There is also the risk of seriously damaging the device or parts of the operator’s plant.

**WARNING!**
Disregarding this safety warning, even if only in part, poses the risk of serious health problems. There is also the risk of damaging the device or parts of the operator’s plant.

**CAUTION!**
Disregarding these instructions can result in damage to the device or to parts of the operator’s plant.

**INFORMATION!**
These instructions contain important information for the handling of the device.

**HANDLING**
- This symbol designates all instructions for actions to be carried out by the operator in the specified sequence.
- **RESULT**
  This symbol refers to all important consequences of the previous actions.

Safety instructions for the operator

**CAUTION!**
Installation, assembly, start-up and maintenance may only be performed by appropriately trained personnel. The regional occupational health and safety directives must always be observed.

**LEGAL NOTICE!**
The responsibility as to the suitability and intended use of this device rests solely with the user. The supplier assumes no responsibility in the event of improper use by the customer. Improper installation and operation may lead to loss of warranty. In addition, the “Terms and Conditions of Sale” apply which form the basis of the purchase contract.

**INFORMATION!**
- Further information can be found on the supplied CD-ROM in the manual, on the data sheet, in special manuals, certificates and on the manufacturer’s website.
- If you need to return the device to the manufacturer or supplier, please fill out the form contained on the CD-ROM and send it with the device. Unfortunately, the manufacturer cannot repair or inspect the device without the completed form.
2.1 Intended use

This radar level transmitter measures distance, level, mass, volume and reflectivity of liquids, pastes and slurries.

It can be installed on tanks, reactors and open channels.

2.2 Scope of delivery

INFORMATION!

Do a check of the packing list to make sure that you have all the elements given in the order.

Scope of delivery – horn antenna

Figure 2-1: Scope of delivery – horn antenna

1. Signal converter and antenna in compact version
2. Antenna extensions (option)
3. Quick Start
4. CD-ROM (including Handbook, Quick Start, Technical Datasheet and related software)

Scope of delivery – Drop antenna

Figure 2-2: Scope of delivery – Drop antenna

1. Signal converter and antenna in compact version
2. Antenna extensions (option) and o-ring for each antenna extension
3. Quick Start
4. CD-ROM (including Handbook, Quick Start, Technical Datasheet, and related software)
Scope of delivery – hygienic antenna

Figure 2-3: Scope of delivery – hygienic antenna

1. Signal converter and antenna in compact version
2. Quick Start
3. CD-ROM (including Handbook, Quick Start, Technical Datasheet, and related software)

**INFORMATION!**
No special tools or training required!
2.3 Visual Check

**WARNING!**
If the display screen glass is broken, do not touch.

**INFORMATION!**
Inspect the packaging carefully for damages or signs of rough handling. Report damage to the carrier and to the local office of the manufacturer.

---

**Figure 2-4: Visual check**

1. Device nameplate (for more data, refer to the handbook)
2. Process connection data (size and pressure rating, material reference and heat number)
3. Gasket material data - refer to the illustration that follows

**Figure 2-5: Symbols for the supplied gasket material (on the side of the process connection)**

1. EPDM
2. Kalrez® 6375

If the device is supplied with an FKM/FPM gasket, there is no symbol on the side of the process connection.

**INFORMATION!**
Look at the device nameplate to ensure that the device is delivered according to your order. Check for the correct supply voltage printed on the nameplate.

**INFORMATION!**
Compare the material references on the side of the process connection with the order.
2.4 Storage

**WARNING!**
*Do not keep the device in a vertical position. This will damage the antenna and the device will not measure correctly.*

![Figure 2-6: Storage conditions](image)

1. When you put the device into storage, do not keep it in a vertical position.
2. Put the device on its side. We recommend that you use the packaging in which it was delivered.
3. Storage temperature range: -40...+85°C / -40...+185°F

- Store the device in a dry and dust-free location.
- Keep the converter out of the sunlight.
- Store the device in its original packing.
2.5 Transport

Figure 2-7: How to lift the device

1. Remove the converter before you lift the device with a hoist.

**WARNING!**
*Lift the device carefully to prevent damage to the antenna.*

2.6 Pre-installation requirements

**INFORMATION!**
*Obey the precautions that follow to make sure that the device is correctly installed.*

- Make sure that there is sufficient space on all sides.
- Protect the signal converter from direct sunlight. If necessary, install the weather protection accessory.
- Do not subject the signal converter to heavy vibrations. The devices are tested for vibration and agree with EN 50178 and IEC 60068-2-6.
2.7 How to prepare the tank before you install the device

**CAUTION!**
To avoid measuring errors and device malfunction, obey these precautions.

2.7.1 Pressure and temperature ranges

![Pressure and temperature ranges](image)

**Figure 2-8: Pressure and temperature ranges**

1. **Flange temperature**
   - FKM/FPM gasket: -40...+200°C / -40...+390°F; Kalrez® 6375 gasket: -20...+200°C / -4...+390°F;
   - EPDM gasket: -50...+150°C / -58...+300°F
   - Depends on the antenna type. Refer to the table that follows.
   - Ex devices: see supplementary operating instructions
2. **Ambient temperature for operation of the display**
   - -20...+60°C / -4...+140°F
   - If the ambient temperature is not between these limits, the display screen switches off automatically
3. **Ambient temperature**
   - Non-Ex devices: -40...+80°C / -40...+175°F
   - Ex devices: see supplementary operating instructions
4. **Process pressure**
   - Depends on the antenna type. Refer to the table that follows.

**WARNING!**
The process connection temperature range must agree with the temperature limits of the gasket material. The operating pressure range is subject to the process connection used and the flange temperature.

<table>
<thead>
<tr>
<th>Antenna type</th>
<th>Maximum process connection temperature</th>
<th>Maximum operating pressure</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>[°C]</td>
<td>[°F]</td>
</tr>
<tr>
<td>PP Drop</td>
<td>+100</td>
<td>+210</td>
</tr>
<tr>
<td>PTFE Drop</td>
<td>+150</td>
<td>+300</td>
</tr>
<tr>
<td>Hygienic</td>
<td>+150</td>
<td>+300</td>
</tr>
<tr>
<td>Horn / Sheet metal horn</td>
<td>+150 (+200) ①</td>
<td>+300 (+390) ①</td>
</tr>
</tbody>
</table>

① Standard max. process connection temperature: +150°C / +300°F. Optional max. process temperature: +200°C / +390°F.
② Standard max. operating pressure: 40 barg / 580 psig. Optional max. operating pressure: 100 barg / 1450 psig.
### 2.7.2 Recommended mounting position

**CAUTION!**
Follow these recommendations to make sure that the device measures correctly.

![Diagram showing recommended nozzle positions for liquids, pastes, and slurries](image)

**Figure 2-9: Recommended nozzle position for liquids, pastes, and slurries**

1. Nozzles for DN40 or DN50 Horn antennas, or DN50 Hygienic antenna
2. Nozzles for DN80, DN100, DN150 or DN200 Horn antennas, or DN80 or DN150 Drop antenna
3. Tank height
4. Tank diameter
5. Minimum distance of nozzle from the tank wall: $\frac{1}{7} \times$ tank height
   - Maximum distance of nozzle from the tank wall: $\frac{1}{3} \times$ tank diameter
6. Minimum distance of nozzle from the tank wall: $\frac{1}{10} \times$ tank height
   - Maximum distance of nozzle from the tank wall: $\frac{1}{3} \times$ tank diameter

**INFORMATION!**
*If possible, do not install a nozzle on the tank centerline.*

**CAUTION!**
*Do not put the device near to the product inlet. If the product that enters the tank touches the antenna, the device will measure incorrectly. If the product fills the tank directly below the antenna, the device will also measure incorrectly.*
More than 1 FMCW radar level meter can be operated in a tank.

2.7.3 Theoretical data for hygienic applications

To make the cleaning of the antenna easier, attach the device to a short socket.

Figure 2-10: Product inlets

1. The device is in the correct position.
2. The device is too near to the product inlet.

Figure 2-11: More than 1 FMCW radar level meter can be operated in a tank

More than 1 FMCW radar level meter can be operated in a tank.

Figure 2-12: Requirements for hygienic applications

1. Maximum height of process connection: 50 mm / 2"
2.8 Installation recommendations for liquids

2.8.1 General requirements

**INFORMATION!**

*We recommend that you configure the device when the tank is empty.*

![Figure 2-13: General Installation recommendations](image)

1. Do not tilt the device more than 2°
2. We recommend that you do an empty spectrum recording if there are too many obstacles in the radar beam (refer to the handbook), or install a bypass chamber or stilling well.
3. 2.5 mm / 0.1" max. for high-dielectric constant liquids
4. Curved and conical tank bottoms. Refer to the handbook for fine adjustment of the device.
5. Beam radius (DN40 horn antenna): increments of 180 mm/m or 2.15'/ft (10°)
   - Beam radius (DN50 horn antenna or DN50 Hygienic antenna): increments of 130 mm/m or 1.55'/ft (7.5°)
   - Beam radius (DN80 horn antenna): increments of 90 mm/m or 1.1'/ft (5°)
   - Beam radius (DN100 horn antenna, DN150 horn antenna, DN200 horn antenna or DN80 Drop antenna): increments of 70 mm/m or 0.83'/ft (4°)
   - Beam radius (DN150 Drop antenna): increments of 35 mm/m or 0.42'/ft (2°)
2.8.2 Standpipes (stilling wells and bypass chambers)

Use a standpipe if:
- There is highly conductive foam in the tank.
- The liquid is very turbulent or agitated.
- There are too many other objects in the tank.
- The device is measuring a liquid (petro-chemicals) in a tank with a floating roof.
- The device is installed in a horizontal cylindrical tank

For more data, refer to the Handbook.

![Figure 2-14: Installation recommendations for standpipes (stilling wells and bypass chambers)](image)

2.9 How to install the device on the tank

2.9.1 How to install a device with a flange connection

Equipment needed:
- Device
- Gasket (not supplied)
- Nuts and bolts (not supplied)
- Wrench (not supplied)
Requirements for flange connections

- Make sure the flange on the nozzle is level.
- Make sure that you use the applicable gasket for the flange dimensions and the process.
- Align the gasket correctly on the flange facing of the nozzle.
- Lower the antenna carefully into the tank.
- Tighten the flange bolts.

Refer to local rules and regulations for the correct torque to apply to the bolts.

For more data, refer to the handbook.

2.9.2 How to install a device with a threaded connection

Equipment needed:
- Device
- Gasket for G 1½ connection [not supplied]
- 50 mm / 2” wrench [not supplied]

Requirements for threaded connections

Refer to local rules and regulations for the correct torque to apply to the bolts.

For more data, refer to the handbook.
2 INSTALLATION

- Make sure the tank connection is level.
- Make sure that you use the applicable gasket for the connection dimensions and the process.
- Align the gasket correctly.
- Lower the antenna carefully into the tank.
- Turn the threaded connection on the housing to attach the device to the process connection.
- Tighten the connection.

Refer to local rules and regulations for the correct torque to apply to the connection.

For more data, refer to the handbook.

2.9.3 How to install a device with a hygienic connection

INFORMATION!
To make the cleaning of the antenna easier, attach the device to a short socket.

BioControl®
Equipment needed:
- Device
- Gasket
- Flange bolts (not supplied)
- Wrench (not supplied)

How to attach a device with a Biocontrol® connection
- Make sure that the flange on the nozzle is level.
- Make sure that you use the applicable gasket for the flange dimensions and the process.
- Align the gasket correctly on the flange facing of the nozzle.
- Lower the antenna carefully into the tank.
- Tighten the flange bolts.

Refer to local rules and regulations for the correct torque to apply to the bolts.
Tri-Clamp®

Equipment needed:
- Device
- Gasket (not supplied)
- Band clamp (not supplied)

![Figure 2-18: Tri-Clamp® connection](image)

1. Tank socket
2. Band clamp

- Make sure that the tank connection is level.
- Make sure that you use the applicable gasket for the connection dimensions and the process.
- Align the gasket correctly.
- Lower the antenna carefully into the tank.
- Attach the band clamp to the process connection.
- Tighten the band clamp.

DIN 11851

Equipment needed:
- Device
- Gasket (not supplied)
- DIN 11851 nut

![Figure 2-19: DIN 11851 connection](image)

1. Tank socket
2. Nut for DIN 11851 connection
• Make sure that the tank connection is level.
• Make sure that you use the applicable gasket for the connection dimensions and the process.
• Align the gasket correctly.
• Lower the antenna carefully into the tank.
• Turn the nut on the device process connection to attach the device to the tank.
• Tighten the connection.

⚠️ Refer to local rules and regulations for the correct torque to apply to the connection.

**SMS**

**Equipment needed:**

- Device
- Gasket (not supplied)
- SMS nut

---

![Figure 2-20: SMS connection](image-url)

1. Tank socket
2. Nut for SMS connection

• Make sure the tank connection is level.
• Make sure that you use the applicable gasket for the connection dimensions and the process.
• Align the gasket correctly.
• Lower the antenna carefully into the tank.
• Turn the nut on the device process connection to attach the device to the tank.
• Tighten the connection.

⚠️ Refer to local rules and regulations for the correct torque to apply to the connection.
2.9.4 How to attach antenna extensions

Horn antenna - antenna extensions

![Horn antenna - how to attach antenna extensions](image)

Equipment needed:
- 3 mm Allen wrench (not supplied)

For more data, refer to the handbook.

Drop antenna - antenna extensions

![Drop antenna - how to attach antenna extensions](image)

**INFORMATION!**
*Drop antenna*: Antenna extensions can only be attached below flanges without the PP/PTFE flange plate option

**CAUTION!**
*Drop antenna*: Make sure that there are not more than 5 antenna extensions attached to a device with a Drop antenna. If there are more than 5 antenna extensions, the device will not measure correctly.

Make sure that you put an o-ring into the groove at the top of each antenna extension.

Equipment needed (not supplied):
- Torque wrench 200 Nm (for the H30 head of the Drop antenna sub-assembly)
- 3 mm Allen wrench

For more data, refer to the handbook.
2.9.5 How to turn or remove the signal converter

**INFORMATION!**
The converter turns 360°. The converter can be removed from the process connection assembly under process conditions.

![Diagram](image)

Figure 2-23: How to turn or remove the signal converter

1. Tool: 5 mm Allen wrench (not supplied)
2. Cover for the wave guide hole on top of the process connection assembly (not supplied)

**CAUTION!**
If you remove the converter, put a cover on the wave guide hole on top of the process connection assembly.
When the converter is attached to the process connection assembly, tighten the lock screw.
2.9.6 How to attach the weather protection to the device

**Equipment needed:**
- Device.
- Weather protection [option].
- 10 mm wrench [not supplied].

The overall dimensions of the weather protection are in "Dimensions and weight" in the handbook.

![Figure 2-24: Installation of the weather protection](image)

- Loosen the bracket nuts on the weather protection.
- Remove the bracket.
- Lower the weather protection onto the device.
- Turn the weather protection so that the keyhole points forward.
- Attach the bracket.
- Lift the weather protection to the top of the housing support pillar.
- Hold the weather protection in the correct position and tighten the bracket nuts.
2.9.7 How to open the weather protection

Equipment needed:

- Weather protection attached to the device.
- Large slotted tip screwdriver [not supplied].

![Figure 2-25: How to open the weather protection](image)

1. Weather protection in its closed position
2. Weather protection in its open position. Minimum clearance in front of the device: 300 mm / 12".

- Put a large slotted tip screwdriver into the keyhole at the front of the weather protection. Turn the screwdriver counterclockwise.
- Pull the top of weather protection up and forward.
- This will open the weather protection.
3.1 Safety instructions

**DANGER!**
All work on the electrical connections may only be carried out with the power disconnected. Take note of the voltage data on the nameplate!

**DANGER!**
Observe the national regulations for electrical installations!

**DANGER!**
For devices used in hazardous areas, additional safety notes apply; please refer to the Ex documentation.

**WARNING!**
Observe without fail the local occupational health and safety regulations. Any work done on the electrical components of the measuring device may only be carried out by properly trained specialists.

**INFORMATION!**
Look at the device nameplate to ensure that the device is delivered according to your order. Check for the correct supply voltage printed on the nameplate.

3.2 Electrical installation: outputs 1 and 2

Output 1 energizes the device and is used for HART® communication. If the device has the second current output option, use a separate power supply to energize output 2.
**Procedure:**
- Remove the housing terminal compartment cover 1.
- Connect the wires to the device. Obey the national electrical codes.
- Make sure that the polarity of the wires is correct.
- Attach the ground to 4 or 7. Both terminals are technically equivalent.

### 3.2.1 Non-Ex devices

![Figure 3-2: Electrical connections for non-Ex devices](image)

1. Power supply
2. Resistor for HART® communication
3. Output 1: 14...30 VDC for an output of 22 mA at the terminal
4. Output 2: 10...30 VDC for an output of 22 mA at the terminal

### 3.2.2 Devices for hazardous locations

**DANGER!**

For electrical data for device operation in hazardous locations, refer to the related certificates of compliance and supplementary instructions (ATEX, IECEx, FM, CSA, ...). This documentation can be downloaded from our website.
3.3 Protection category

**INFORMATION!**
The device fulfils all requirements per protection category IP 66/67. It also fulfils all requirements per NEMA type 4X (housing) and type 6P (antenna).

**DANGER!**
Make sure that the cable gland is watertight.

![Diagram showing how to make the installation agree with protection category IP 67](image)

- Make sure that the gaskets are not damaged.
- Make sure that the electrical cables are not damaged.
- Make sure that the electrical cables agree with the national electrical code.
- The cables are in a loop in front of the device ① so water does not go into the housing.
- Tighten the cable feedthroughs ②.
- Close unused cable feedthroughs with dummy plugs ③.
4.1 Technical data

**INFORMATION!**
- The following data is provided for general applications. If you require data that is more relevant to your specific application, please contact us or your local sales office.
- Additional information (certificates, special tools, software,...) and complete product documentation can be downloaded free of charge from the website.

<td>Ingress protection</td>
<td>IP 66/67 equivalent to NEMA type 4X (housing) and type 6P (antenna)</td>
</tr>
</tbody>
</table>
Installation conditions

| Process connection size | The nominal diameter (DN) should be equal to or larger than the antenna diameter. If the nominal diameter (DN) is smaller than the antenna, either:
| - provide the means to adapt the device to a larger process connection on the tank (for example, a plate with a slot), or
| - use the same process connection, but remove the antenna from the device before installation and fit it from inside the tank. |
| Process connection position | Make sure that there are not any obstructions directly below the process connection for the device. |
| Dimensions and weights | Refer to “Technical data: Dimensions and weights” in the Handbook. |

Materials

| Housing | Standard: Polyester-coated aluminium  
| Option: Stainless steel (1.4404 / 316L) |
| Wetted parts, including antenna | Standard for Horn / Sheet metal horn antenna: Stainless steel (1.4404 / 316L)  
| Option for Horn antenna: Hastelloy® C-22 (2.4604 / 316L)  
| Standard for Drop antenna: PTFE, PP  
| Option for Drop antenna: PP or PTFE flange plate protection  
| Hygienic antenna: PEEK - this material agrees with FDA regulations |
| Process connection | Standard for Horn, Sheet metal horn and Drop antennas: Stainless steel (1.4404 / 316L) – a PP or PTFE flange plate protection is also available for the Drop antenna  
| Standard for Hygienic antennas: PEEK  
| Option: Hastelloy® C-22 (2.4604 / 316L) – for Horn antennas only |
| Gaskets (and o-rings for the sealed antenna extension option) | **Hygienic antenna:**  
| BioControl®, FKM/FPM [-20...+150°C / -4...+300°F]; EPDM [-20°C...+150°C / -4...+300°F]  
| SMS, Tri-Clamp®, DIN 11851: without  
| **PTFE Drop antenna:**  
| FKM/FPM [-40...+150°C / -40...+300°F]; Kalrez® 6375 [-20...+150°C / -4...+300°F]; EPDM [-50°C...+150°C / -58...+300°F]  
| **PP Drop antenna:**  
| FKM/FPM [-40...+100°C / -40...+210°F]; Kalrez® 6375 [-20...+100°C / -4...+210°F]; EPDM [-40°C...+100°C / -40...+210°F]  
| **Horn / Sheet metal horn antenna:**  
| FKM/FPM [-40...+200°C / -40...+390°F]; Kalrez® 6375 [-20...+200°C / -4...+390°F]; EPDM [-50°C...+150°C / -58...+300°F]  
| **Feedthrough** | Standard: PEI [-50...+200°C / -58...+390°F – max. range. The feedthrough temperature limits must agree with the temperature limits of the gasket material and antenna type. If the distance piece option is not attached, the maximum temperature is 150°C / 300°F.]  
| Option: Metglas® [-30...+200°C / -22...+390°F – max. range. The feedthrough temperature limits must agree with the temperature limits of the gasket material and antenna type. If the distance piece option is not attached, the maximum temperature is 150°C / 300°F.] |
| Weather protection (Option) | Stainless steel (1.4301 / 304) |

Process connections

| Thread | G 1½ (ISO 228); 1½ NPT (ASME B1.20.1) |
## Flange version

| EN 1092-1 | DN40...80 in PN40 [Form B1], DN100...200 in PN16 or PN40 [Form B1], DN40...150 in PN63 or PN100 [Form B1]; others on request |
| ASME B16.5 | 1½"...8" in 150 lb RF, 1½"...6" in 300 lb RF, 1½"...4" in 600 lb or 900 lb RF; 1½"...2" in 1500 lb RJ; others on request |
| JIS B2220 | 40...100A in 10K; others on request |
| Hygienic | BioControl® DN50; Tri-Clamp® 2"; DIN 11851 DN50; SMS 51; others on request |
| Other | Others on request |

## Electrical connections

| Power supply | Terminals output 1 – Non-Ex / Ex i: 14...30 VDC; min./max. value for an output of 22 mA at the terminal |
| Terminals output 1 – Ex d: 20...36 VDC; min./max. value for an output of 22 mA at the terminal |
| Cable entry | M20×1.5; ½ NPT |
| G ½ (not for stainless steel housings) |
| M25×1.5 (for stainless steel housings only) |
| Cable gland | Standard: none |
| Options: M20×1.5 (for non-Ex and Ex -approved devices with M20×1.5 and M25×1.5 cable entries); others are available on request |
| Cable entry capacity (terminal) | 0.5...1.5 mm² |

## Input and output

| Current output | Output signal [Output 1] 4...20 mA HART® or 3.8...20.5 mA acc. to NAMUR NE 43 |
| Output signal [Output 2 - optional] 4...20 mA [no HART® signal] or 3.8...20.5 mA acc. to NAMUR NE 43 |
| Resolution | ±3 µA |
| Temperature drift | Typically 50 ppm/K |
| Error signal | High: 22 mA; Low: 3.6 mA acc. to NAMUR NE 43 |

## Approvals and certification

| CE | This device fulfils the statutory requirements of the EC directives. The manufacturer certifies successful testing of the product by applying the CE mark. |
| ATEX | This device fulfils the statutory requirements of the EC directives. The manufacturer certifies successful testing of the product by applying the CE mark. |

**ATEX**
